Professional Summary

Second-year B.Tech student specializing in Artificial Intelligence & Machine Learning with strong foundations in Data Structures, Algorithms, and Cloud Computing. Experienced in developing impactful projects using C++, Python, and AWS services. Passionate about solving real-world problems through scalable software solutions and actively engaged in competitive programming and open-source contributions.

Education

Bachelor of Technology (B.Tech) – Artificial Intelligence & Machine Learning [Rajiv Gandhi Proudhyogiki Vishwavidyalaya , Indore] | Expected Graduation: 2028

Technical Skills

- **Programming:** C++, Python
- **Libraries/Frameworks:** NumPy, Pandas
- **Concepts:** Data Structures & Algorithms, Object-Oriented Programming
- **Tools:** GitHub, VS Code
- **Cloud & APIs:** AWS, Twilio API

Projects

Vani Seva – Voice-Based Government Scheme Information System

- Designed a toll-free voice platform enabling rural users without smartphones to access government scheme information.
- Integrated AWS cloud services and Twilio APIs for seamless voice interaction.
- Enhanced accessibility for economically weaker communities, reducing information barriers.

Health Diet Recommendation System (C++)

- Built a C++ application that generates personalized diet plans based on user inputs (age, weight, health conditions).
- Supported multiple conditions including diabetes, obesity, and general weakness.
- Improved user awareness of healthy lifestyle choices through tailored recommendations.

Achievements & Activities

- Preparing for **TCS CodeVita** and other competitive programming contests.
- Exploring open-source contributions, including **Google Summer of Code** opportunities.
- Consistently practicing advanced Data Structures & Algorithms to strengthen problem-solving skills.

Soft Skills

Problem Solving • Analytical Thinking • Team Collaboration • Continuous Learning
